- Mentoring development team on Agile & SDLC's best practices to maximize team's potential and enhance their productivity, leading to company's overall growth
- Liaising with product team to understand requirements and communicating the same to development team to convert requirements into quality deliverables in a timely manner
- Guiding core team members by regular code review and offering support as necessary to resolve issues, also working as an **individual contributor**
- Ensuring that the best practices are followed by the team and maintaining high quality of deliverables
- Ensuring timely release of premium-quality applications that provide intuitive and secure experience to users
- MEAN stack application, Used, **Node** for backend, **Angularjs** & **React** for front-end, **React-native** for mobile app, **AWS** for cloud, **Nginx** as a webserver, **Bitbucket** for version controling, **JIRA** for bug tracking and sprint planning, and Bitbucket pipeline for **CICD**.

SENIOR SOFTWARE ENGINEER/LEAD ENGINEER

Clicktable Technologies | April 2015 - December 2017
A cloud-based application for fine dining restaurants to manage guestbook, reservations, waitlists, events and offers.

- Started this huge project from the scratch and single-handedly delivered the first MVP and then built the team by hiring the right resources
- Worked closely with product owners and engineers on issues related to design and requirements
- Gained ample business knowledge to be able to actively participate in specifying software solutions for business needs
- Ensured that all software developed within our team satisfies the business requirements, as specified

SENIOR PRODUCT DEVELOPER

Djubo - 360 Hotel Suite | May 2014 - April 2015
An end-to-end hotel sales management platform with a centralised reservation system, which aims to help small and medium-sized hotels become profitable.

- Worked as a Lead Front End Developer at Djubo/Flushrooms with deep understanding of entire application stack requirements
- Created interfaces for web and mobile, with specialization in building responsive and elegant web UI
- Interpreted graphic visual or interaction designs in HTML, CSS and JavaScript
- Created visually appealing web pages or interfaces
- Tested cross-browser, cross-platform, and/or cross-device compatibility for inconsistencies
- Tested for compliance to specified standards
- Conducted observational user testing and reviewed designs against usability heuristics

SOFTWARE ENGINEER

Ashtbit Technologies Pvt. Ltd. | Oct 2012- May 2017
An end-to-end IT products and service company developing solutions, like Nauticalus and Compass
