EXPERIENCE

ENGINEERING MANAGER   TEAM SIZE: 6

Skeps | August 2021 - To Date
Next-gen POS financing platform that enables banks and fintechs

- Proven record of recruiting, developing, and retaining great talent, building world-class development teams.
- Conducted monthly performance reviews and bi-annual appraisals,
- Managed a team of 6 engineers and was responsible for their mentorship, growth, performance evaluation, and job satisfaction.
- Provided Assistance to teams in Release Scoring: Adherence to timelines, unit tests, and scope.
- Led organizational changes that allow your teams to deliver better quality at a faster rate.
- Ensured compliance with the established software development methodology and Software Development Life Cycle (SLDC) for these projects.
- Conducted application code reviews to ensure compliance with application development best practices.
- Implemented well-architected, well-documented, high-quality code at a fast pace.
- Utilized high-level information architecture to design modules for complex programs.
- Tech Stack: A Microservice-based and blockchain-backed architecture, **Node, MYSQL, Nginx, Docker**, **Github** for version control, **JIRA** for bug tracking and sprint planning, and **Jenkins** pipeline for **CI**.

LEAD ENGINEER   TEAM SIZE: 5

Clik.ai | August 2019 - Aug2021
*AI enabled automation software for banks, CRE investors and servicers*

- Implemented various login strategies(email, social, SSO/SAML) to increase user adaptablity
- Redesigned APIs to make them paginated, which resulted in lower latency, lower bounce rate, and higher user engagement
- Design, build and manage the ELK (Elasticsearch, Logstash, and Kibana) cluster for centralized logging and search functionalities for the App.)
- Managed and configured (Amazon Web Services) cloud services like EC2, S3bucket, Security groups, RDS, VPC, Route53, Cloud Watch, Cloud Trail, EBS, ELB, Auto - Scaling, AMI, Elastic search, IAM through AWS Console and API Integration.
- Identifying automation opportunities and bringing the automated infrastructure tools to existing teams and setting new software conventions.
- Mentoring development team on Agile & SDLC's best practices to maximize team's potential and enhance their productivity, leading to company's overall growth
- Liaising with the product team to understand requirements and communicating the same to the development team to convert requirements into quality deliverables in a timely manner
- Guiding core team members by regular **code review** and offering support as necessary to resolve issues
- MERN stack application, Used, **Node, React, PostgreSQL, Nginx, Elastic search, Kibana, Logstash, AWS** for cloud, **Bitbucket** for version controlling, **JIRA** for bug tracking and sprint planning, and Bitbucket pipeline for **CI**.

LEAD ENGINEER   TEAM SIZE: 8

LexInnova | *January 2018 - July 2019*

A complete AI-driven solution for efficiently identifying, interviewing, and hiring quality candidates.

- Refactored the legacy code(front-end) and reduce the build size by 30%, which resulted in better load time and a more maintainable codebase.
- Implemented CI and git workflow.
- Leading the design, user flow, schema designing, and architecture of the product
- Guiding core team members by regular code review and offering support as necessary to resolve issues, also working as an **individual contributor**
- Ensuring that the best practices are followed by the team and maintaining the high quality of deliverables
- MEAN stack application, Used, **Node** for backend, **Angularjs** & **React** for front-end, **React-native** for mobile app, **AWS** for cloud, **Nginx** as a webserver, **Bitbucket** for version controlling, **JIRA** for bug tracking and sprint planning, and Bitbucket pipeline for **CICD**.

SENIOR SOFTWARE ENGINEER/LEAD ENGINEER

Clicktable Technologies | *April 2015 - December 2017*

A cloud-based application for fine dining restaurants to manage guestbook, reservations, waitlists, events and offers.

- Started this huge project from the scratch and single-handedly delivered the first MVP
- Listed available restaurants within 5km radius, on google maps
- Worked closely with product owners and engineers on issues related to design and requirements
- Gained ample business knowledge to be able to actively participate in specifying software solutions for business needs
- Optimized web application to have Lighthouse score of 88 on desktop and 85 on mobile.

SENIOR PRODUCT DEVELOPER

Djubo - 360 Hotel Suite | *May 2014 - April 2015*

An end-to-end hotel sales management platform with a centralised reservation system, which aims to help small and medium-sized hotels become profitable.

- Worked as a Lead Front End Developer at Djubo/Flushrooms with a deep understanding of entire application stack requirements
- Created interfaces for web and mobile, with specialization in building responsive and elegant web UI
- Interpreted graphic visual or interaction designs in HTML, CSS, and JavaScript
- Tested cross-browser, cross-platform, and/or cross-device compatibility for inconsistencies
- Conducted observational user testing and reviewed designs against usability heuristics

SOFTWARE ENGINEER

Ashtbit Technologies Pvt. Ltd. | *Oct 2012- May 2014*

An end-to-end IT products and service company developing solutions, like Nauticalus and Compass
